Description	<p>TEXT</p> <p>Information and communication Technologies (ICTs) help support effective outbreak surveillance and control strategies, including but not limited to, contact tracing, social mobilization, mapping, communication, monitoring, and response. They also can assist national and international efforts to control the spread of the disease; they have played and continue to play a critical role in raising awareness about Ebola, prevent the spread of the disease, and support the role of frontline healthcare workers by providing better means to communicate simple, trustful and reliable instructions and information. In such innovative approaches that connect biomedical and social sciences, that are community-based, and that use new technology that proactively forecast/anticipate, detect, and respond to current and emerging threats, while providing primary healthcare coverage for all. Full spectrum of promotion of national health systems prevention, treatment, and care services in an inclusive way that provides equal access and brings new opportunities and benefits to personalized medicine, technology and social practices to a globalised world. However, digital innovations during and post- Zika and Ebola outbreak continue to be developed; unforeseen consequences should be tackled promptly.</p> <p>Still, there is a lack of uncovered hosts of barriers and obstacles to effective use of information, including the complexity and usability of the software, the inability of the software to support certain unique public health reporting needs, the learning curve for public health workers, and the lack of standards for effective data exchange, guidance to effectively strategize about appropriate ICT-innovations investments and current Zika epidemics crisis incidents and forefront data and information sharing systems as front-line safety and protection of affected communities or vulnerable populations against emerging epidemics impact relies on seamless information sharing, global leadership commitment and investment.</p>
Question 1	(1 point) Choose the word that is far in meaning from "mapping"
Pas encore répondu	<p>Vous devez choisir une réponse :</p> <p><input type="radio"/> designing</p> <p><input type="radio"/> framing</p> <p><input type="radio"/> laying out</p> <p><input checked="" type="radio"/> hatching</p>
Noté sur 1,00	
Question 2	(1 point) Choose the word that is far in meaning from "awareness"
Pas encore répondu	<p>Vous devez choisir une réponse :</p> <p><input type="radio"/> consciousness</p> <p><input checked="" type="radio"/> obliviousness</p> <p><input type="radio"/> knowledge</p> <p><input type="radio"/> heed</p>
Noté sur 1,00	
Question 3	(1 point) Choose the word that is close in meaning to "curve"
Pas encore répondu	<p>Vous devez choisir une réponse :</p> <p><input type="radio"/> decline</p> <p><input type="radio"/> round</p> <p><input checked="" type="radio"/> tendency</p> <p><input type="radio"/> wheel</p>
Noté sur 1,00	
Question 4	(1 point) Choose the word that is far in meaning from "seamless"
Pas encore répondu	<p>Vous devez choisir une réponse :</p> <p><input type="radio"/> perfect</p> <p><input type="radio"/> total</p> <p><input type="radio"/> entire</p> <p><input checked="" type="radio"/> partly</p>

Question 6	(3 points) These statements are about the characteristics of an email. Choose the statements that are correct.
Pas encore répondu	<p>Vous devez choisir au moins une réponse :</p> <p><input type="checkbox"/> It's not fast. Most messages are not delivered within minutes – sometimes seconds – around the world without the inconvenience and cost of using postal service. In fact, postal service is often referred to as "snail mail" by email users.</p> <p><input checked="" type="checkbox"/> It's personal. While the nature of email is informal, its efficiency is an excellent substitute for telephone conversations.</p> <p><input checked="" type="checkbox"/> You can think through your response. Like a letter, you can type your reply and make changes before sending.</p> <p><input checked="" type="checkbox"/> The sender and the receiver don't have to be working at the same time. Email avoids problems such as telephone tag or trying to contact someone in a different time zone.</p> <p><input type="checkbox"/> Email does not make it easy to keep a record of your communication. You cannot save and refer to later copies of the emails you send as well as those you receive.</p> <p><input checked="" type="checkbox"/> You can reach a lot of people at once. It is possible to send one message to hundreds of recipients at once, or you can send a private message to one individual.</p>

Question 7

Pas encore répondu

Note sur 5,00

(5 points) Read the following paragraph and choose the correct article. If no article is necessary, choose Ø.

Imagine you are at a conference on Ø

artificial intelligence. Suddenly you realize you are about to bump into someone, but the person, just at the last moment, gracefully dodges you. You start to apologize as this person turns to face you, but you rudely cut your own apology short when you realize this person is actually a robot.

The robot, however, continues with its polite apology before moving on.

Does a robot have a better developed social skills than you? Its apology sounds completely sincere even though a near collision couldn't have been the robot's fault; it has been equipped with a laser and sonar components which sense the distance and steer it away from Ø people and things. In addition, it is hoped that this type of Ø robot will be programmed to socialize with Ø people. In other words, it will be able to recognize and ask Ø people relevant questions based on the previously collected information. So, imagine yourself in the same situation. What reaction would you have? Would you offer an apology?

Question 8
